## What are the benefits of Cloud Computing?

**Flexibility** - Users can scale services to fit their needs, customize applications and access cloud services from anywhere with an internet connection.

**Efficiency** - Enterprise users can get applications to market quickly, without worrying about underlying infrastructure costs or maintenance.

**Strategic value** - Cloud services give enterprises a competitive advantage by providing the most innovative technology available.

### IBM Cloud Feature Code

Get enhanced access to the IBM Cloud the cloud platform that offers a choice of scalable and flexible resources in one consistent experience. Bringing together APIs and services, IBM Cloud offers a rich and continuously expanding ecosystem of services to accelerate the pace of innovation.

The Garage practices are IBM's approach to enable business, development, and operations to continuously design, deliver, and validate new solutions. The practices and workflows cover the entire product lifecycle from inception through capturing and responding to customer feedback and market changes.

The Garage practices are industry-recognized and represent a unique, holistic IBM point-of-view and describes the complete cloud transformation lifecycle with enhancements that support the enterprise at scale. The result is a method that is proven, aligned with industry best practices, and scalable to any size engagement.

## Dashboard

## For you

## Build

Explore IBM Cloud with this selection of easy starter tutorials and services.

## Create a custom dashboard

Create a shareable dashboard that you can customize with widgets, scope, and your own layout.

Getting started

3 min

## Explore IBM Cloud Shell

Try a command-driven approach for creating, developing, and deploying a web project.

Getting started

2 min

Build integrated apps, compute runtimes and microservices and use Cloud® Object Storage services for data storage.

[Details](#)[Actions...](#)**Manage**[Plan](#)[Connections](#)**Let's get started with IBM Watson IoT Platform**

Securely connect, control, and manage devices. Quickly build IoT applications that analyze data from the physical world.

[Launch](#)[Docs](#)**Ready for the next level?****IBM Watson IoT Platform Journey****Lite**

The Lite service plan provides a lightweight development environment to get you started with the connectivity capabilities of Watson IoT Platform.

- Free
- 200 MB data-transfer limit
- 500 application bindings limit
- 500 registered devices limit

**Non-Production**

The Non-Production service plan is a full-featured, fully-integrated offering that enables you to explore Watson IoT Platform to see how the service can fit into your IoT environment.

- Starts at \$500 per month
- Capacity limit based on device type
- Optional Analytics Service and Blockchain Service add-ons

**Production**

The Production service is a fully managed SaaS offering that enables you to manage and analyze enterprise IoT data.

- Includes IBM Service & Support
- Pricing based on number of devices per device type
- Optional Analytics Service and Blockchain Service add-ons

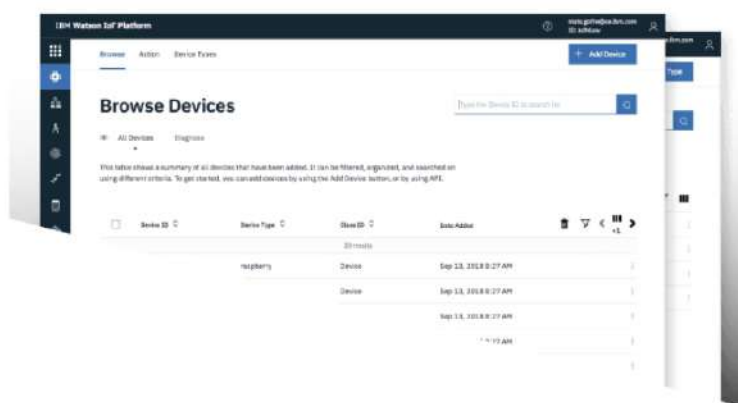

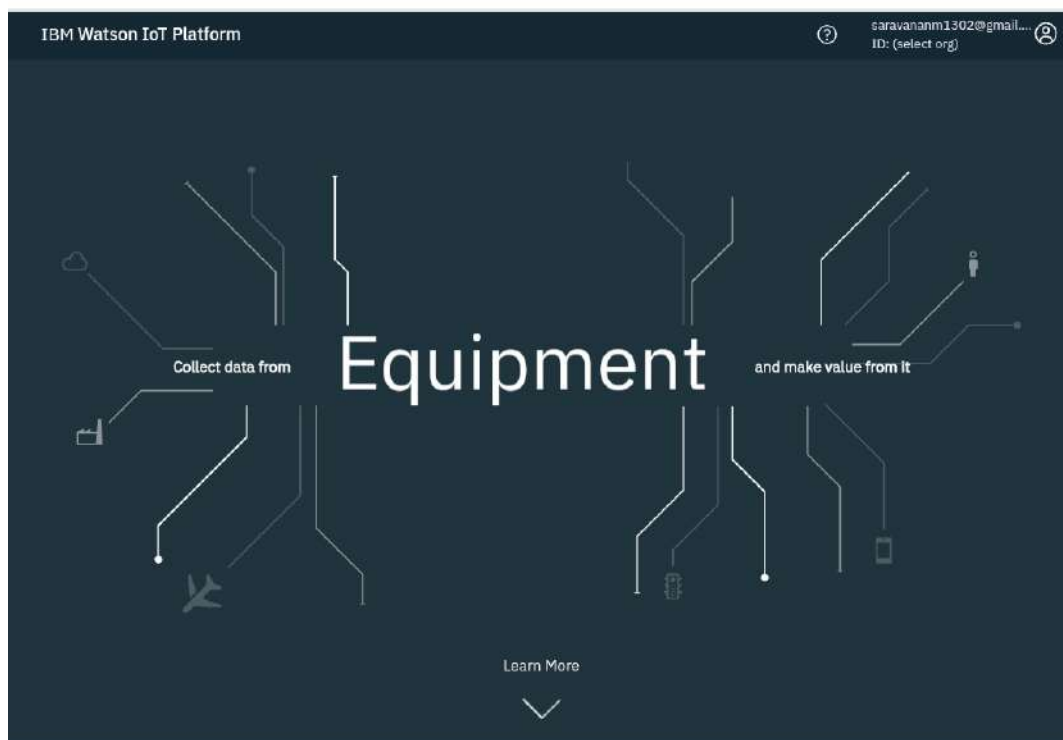

[Continue your journey on IBM Marketplace](#)**Learn about IBM Watson IoT Platform**

Understand the architecture, concepts, and features of the IBM Watson IoT Platform service and see how it fits in the extended IBM Cloud universe and your own IoT infrastructure.

**Expand using step-by-step recipes**

Browse a multitude of custom recipes to connect your devices to IBM Watson IoT Platform, expand on the basic service, and consume the device IoT data flow in your applications.

## Powerful web dashboard

Flexible, scalable and easy to use

We provide a clean and simple UI where you can simply and easily add and manage your devices, control access to your IoT service, and monitor your usage. See at a glance the things you are interested in.

## What can we do for you?

We are a fully managed, cloud-hosted service that is designed to simplify and derive the value from your IoT devices.
